

# Associated Training Corporation Presents

## Operating and Maintaining Capacitors

A PowerPoint presentation containing more than 60 slides  
with Instructor notes and student workbook.

This training module is developed specifically for persons operating and maintaining capacitors to correct power factor issues. It gives your instructor the ability to demonstrate in detail the importance of Power Factor correction. Designed to be presented in 1, 2 or 4 hour segments the animated PowerPoint presentation is available on CD as "Plug and Play".

This up-to-date training package can be used the same day it arrives. Additional workbooks may be purchased or you can copy them at your facility from a master document we provide.

Visit our Website at [www.atc-trng.com](http://www.atc-trng.com)

### Topics included are:

- Real, Reactive Energy, Inductive and Capacitive Loadings – VARS
- Capacitor Controls including Time, Time Temperature, VAR, Current & Voltage and Fixed Banks
- Testing Capacitors with Capacitance Meters
- Safe Work practices include Grounding and Shorting Capacitors
- Blown Fuses and unbalanced voltage/currents are explained
- How Capacitors improve Power Factor
- Capacitor Inspection Techniques
